PROFESSIONAL SUMMARY

Passionate and dedicated Cyber Security student currently pursuing B.E. in Computer Science and Engineering (Cyber Security). Skilled in frontend and web development, with a strong foundation in Java, Python, networking, and Linux. Completed industry internships in phishing awareness and secure coding, and earned 15+ professional certifications.

TECHNICAL SKILLS

Cyber Security

Networking Fundamentals • Linux • Secure Coding • Phishing Awareness • OWASP Basics

Programming

Java • Python • JavaScript • C++ (OOP)

Frontend Development

HTML5 • CSS3 • JavaScript • React (Learning) • Responsive Web Design

Web Development

Responsive Web Development • REST APIs (Learning) • Git & GitHub

UI/UX & Design

UI/UX Design • Graphic Design • Figma • Canva

Tools

VS Code • Linux CLI • Nmap & Wireshark (Learning) • AI Tools

CERTIFICATIONS

- Introduction to Cybersecurity — Cisco Networking Academy
- Object Oriented Programming using C++ — NPTEL
- Java Programming Fundamentals — Infosys Springboard
- Python Fundamentals — Infosys Springboard
- Unlocking the Power of JavaScript — Scaler
- Responsive Web Design — freeCodeCamp
- ChatGPT and AI Tools Workshop — Be10X

EDUCATION

B.E. Computer Science and Engineering (Cyber Security)

Prince Dr. K. Vasudevan College of Engineering and Technology

Currently pursuing • Cyber Security • Secure Coding • Network Fundamentals

INTERNSHIPS

Cyber Security Intern | CodeAlpha

1 Month

- Practical exposure to cybersecurity concepts and real-world applications.
- Worked on Phishing Awareness Training and Secure Coding Review practices.

Cyber Security Intern | CODEC

May-June 2026

- Exposure to security tools, concepts, and industry-standard workflows.
- Strengthened knowledge of security best practices and secure coding principles.

KEY PROJECTS

Phishing Awareness Training Platform

Interactive training solution for phishing awareness and digital security best practices.

LearnHub & Educational Web Applications

Responsive web applications focused on learning and knowledge sharing using HTML, CSS and JavaScript.

35+ Projects Portfolio

Projects covering web development, programming fundamentals, Java/Python, React and cybersecurity concepts.

BloodConnect - Blood Donor Registry

Web-based donor registry and availability search system developed for a Smart India Hackathon problem statement.

CAREER FOCUS

Interested in opportunities involving Cyber Security, Frontend Development and Web Development, with an emphasis on secure, user-friendly digital applications.
